Sprint 2 Report – CSE 115A

Sprint #2 Report, RentWise, RentWise727, 11/6/2024

· **Actions to stop doing:** These are the activities or actions the team determined they should stop doing. This is the answer to the question, "What things should we stop doing?" The items should take the form of a brief description of what the team wants to stop doing, followed by a brief explanation. If there are no items, this section should describe why the team is completely satisfied with their current process.
Examples: The team should stop holding daily scrum meetings at 7am in the morning, because nobody can make that meeting time. The team should stop allowing daily scrum meetings to go over 15 minutes, because the meetings are less effective that way.

- Divvying up large broad tasks

· **Actions to start doing:** These are the activities   actions the team would like to start doing to improve their development process. This is the answer to the question, "What should we start doing?" The items should take the form of a brief description of what the team wants to start doing, followed by a brief explanation.
Examples: The team should schedule m should be more accurate at estimating work tasks, since tasks were consistently more group work sessions, since these are very effective at getting work done. The teander-estimated last sprint.
- **Longer team meetings AT LEAST once a week**
- **Have more specific tasks, individual sub-tasks**
- **Delegate tasks better = create own tickets on Jira and let team know what EXACT component to work on**
- **More communication**
- **Work on frontend first?**

· **Actions to keep doing:** This is the answer to the question, "What is working well that we should continue to do?" The items should take the form of a brief description of what the team wants to start doing, followed by a brief explanation.

- Friendly communication
- 3 daily questions to keep everyone up to date on ongoing tasks

· **Work completed:** This is a list of the user stories that were completed during the previous sprint, and a list of the user stories not completed during this sprint (but which were part of this sprint, and were in the sprint plan).

- Adding listing on landlords side that is connected to the database

- Most of the login/register functionality

Work not completed:

- having a feed of listings on the renters side
- Proper integration of the login/register functionality

· **Work completion rate:** This section should report the following: total number of user stories completed during the prior sprint. Total number of estimated ideal work hours completed during the prior sprint. Total number of days during the prior sprint. For the previous sprint, the user stories/day and ideal work hours/day figures should be reported. For sprints past the first sprint, this section should also provide the average user stories/day and average ideal work hours/day figures computed across all sprints to date. The final sprint burnup chart for the previous sprint should be available for viewing in the lab and an email of this chart sent to the TA/prof.

Finished 6 issues and achieved 2 user stories during this print.
Estimated hours per user story: 6-12 hours
Around 40-60 hours in total, the average ideal hours/day could be 2-3 hours/day per team member, around 0.15 user stories/day

Date - October 22nd, 2024 – November 4th, 2024

Sprint goal – implement a system where landlords can create their own listings
